```

I ported it some days ago (after May 19) and have the distfile as:

```
# sha256 /usr/ports/distfiles/RealPlayer-10.0.9.809-20070726.i586.rpm
SHA256 (/usr/ports/distfiles/RealPlayer-10.0.9.809-20070726.i586.rpm) =
3e84a651904f89cff6803982c72c399b3fc1ab1b70dacc35caela6d422583ef8
```

if you need it, just drop me a line off-list;

matthias
