

**As one of the largest Internet retailers on the web, ClickBank closes a sale somewhere on the planet every three seconds. We have an opening for a System Administrator in our Broomfield, Colorado office.**

**Job Summary:** The System Administrator is responsible for advanced system administration across multiple Linux-based OS platforms. Activities include system selection, inventory, configuration, compliance, and maintenance. This position also has on-call requirements.

**Key responsibilities include, but are not limited to:**

- Install, configure, and maintain Linux/BSD-based operating systems
- Deploy security and other pertinent system patches on a regular basis
- Install and connect x86 systems in a data center environment
- Tune and analyze systems for optimal performance
- Develop, deploy, execute and maintain system shell scripts
- Mentor and support fellow team members.
- Participate actively in an Agile environment.

**Qualifications and minimum requirements:**

- Experience managing and maintaining Linux/BSD-based operating systems
- Experience configuring and managing x86 systems
- Experience with Open Source applications
- Experience testing web base applications
- Experience communicating effectively with stakeholders in the development life cycle
- Ability to work in a team environment yet be self directed, proactive, and action oriented
- Excellent diagnostic and troubleshooting skills
- Good verbal, written and organizational skills
- Experience with a ticket system
- Must have 4+ years experience as a system administrator
- Experience with FreeBSD or RedHat Linux

**Additional skillsets desired:**

- Experience with Windows Server
- Experience with authentication technologies (LDAP, SecurID, pre-shared keys)
- Experience with Agile methodologies is a plus
- Experience with Apache Tomcat is a plus
- Experience with MySQL
- Experience with Java
- Experience with Cisco routers
