

Job Description

SwiftTest is fast-paced results oriented company. Our CEO is passionate about the company and the performance of our employees. We are looking for talented and motivated employees. Our company fosters creativity, encourages innovation and rewards self-motivation and hard work. We are interested in individuals who thrive in a passionate, challenging environment and bring imagination and energy to work.

As we continue to grow our business, we seek to hire a Fibre Channel (FC) Developer to join the research and development team where you will have an impact.

Role

As Fibre Channel Developer, you will drive the design and development of advanced Fibre Channel and related convergence features of our system software. You will be actively participating in researching emerging network technologies, performing in-depth analysis of the customer needs and of the existing software, hardware and networking systems in both Fiber Channel and converged infrastructures. Your work will include all phases of a product development, from architecture and design, through implementation, testing and early support stages, with additional focus on the core protocol features and the means to achieve and measure the best functional and performance operational metrics for these features.

Primary Responsibilities

- Design, development, debugging and maintenance of Fibre Channel software solutions
- Improving storage and networking protocol performance, capacity and benchmarking solutions
- Creating and implementing new protocol modules and enhancing existing protocol stacks

Required Experience and Skills

- Solid networking and protocol development experience is essential
- Background/experience in SCSI, iSCSI, FCoE
- Proficiency in C/C++ programming, along with strong test and debugging skills

Education and Experience

- BSEE or BS Computer Science/Math, or equivalent
- 3-5+ years of Fibre Channel and/or Linux kernel/device driver experience
- Working/worked for a storage company is a plus

Company Description

As the leader in storage validation, SwiftTest provides advanced testing and analytics solutions for the modern data center. Trusted by equipment manufacturers, Fortune 500 IT organizations, and leading cloud service providers throughout the world, SwiftTest empowers storage experts with the insight they need to deliver high quality storage products and services. Addressing file, block, and object storage validation, SwiftTest has the performance required to stress today's most complex infrastructure to its limits. Visit www.SwiftTest.com for more information.

Company Benefits

- Competitive Salary and Paid Health Benefits for Employees (pre-tax employee contribution for dependents)
- Paid Time Off (PTO)
- 401(k) Plan

This is not a **remote/telecommuting position and no relocation available**. SwiftTest is located in Silicon Valley, Santa Clara, California, San Francisco Bay Area

Submit resumes to Kathleen Nichols/Human Resources and Administration Manager knichols@swifttest.com.
